EXPERIENCE

29TH NOVEMBER, 2022 – 26TH AUGUST, 2023

SB SOLUTION PVT LTD,

I worked as Junior Front-End Angular Developer. I managed front-end development for ongoing projects and created new front-end user interfaces (UIs) for brand-new applications on document management systems, banking loan automation, loan approval, and loan management as part of my work with senior developers and QA application testers. The applications were developed using Angular as a front-end framework and the Spring Boot as backend Framework which is a Java Framework, along with the IntelliJ IDE, Microsoft SQL Server, HTML, SCSS, TypeScript, and BOOTSTRAP. I also undertook application testing during my initial days at the company. Testing features and functionalities of ongoing projects helped me to gain an understanding of the application system and the development process.
